August 29, 2018

D. Baxter
Manager, Policy and Planning

I hereby certify that the Municipal Council, at its meeting held on August 28, 2018 resolved:

That, the following actions be taken with respect to the 7th Report of the Trees and Forests Advisory Committee from its meeting held on July 25, 2018:

a) the Civic Administration BE ADVISED of the following comments from the Trees and Forests Advisory Committee with respect to the Parks and Recreation Master Plan:

- it should be ensured that trees continue to populate the City of London as it is “The Forest City” and more trees should be planted in shared recreation spaces;
- it is recommended that a shade policy be created as a task item and implemented under the Parks and Recreation Master Plan;
- selective tree species should be planted in parks and recreation areas to assist with safer shaded areas;
- older trees should be kept and maintained as much as possible and all trees should be properly maintained (watering, trimming, etc.);
- citizens of the City of London should be engaged with respect to what is being done to protect and encourage trees and forests in their area;
- tree-related communities (i.e., ReForest London) should be allowed to use parks and recreation facilities to hold events;
- the Parks and Recreation Master Plan should explicitly recognize the importance of park spaces play in the local environment and that park spaces should be designed in such a way as to enhance the environmental benefits they offer; and,
- it is recommended that a Naturalization Policy be included as a task item under the Parks and Recreation Master Plan;

b) the Civic Administration BE ADVISED of the following comments of the Trees and Forests Advisory Committee with respect to the City of London Tree Protection By-law:

- there should be a standardized form as part of the application package for both the “Arborist Report” and the “Arborist Opinion”;
- the by-law should include a minimum canopy target of 51% of irreversible die back;
- the definition of “Pest” should be revised to include an infestation causing detrimental and irreversible damage to the direct health of a tree;
- the distinctive tree size should be reduced to 25 cm for a permit;

- the definition of “Replacement Tree” should be revised to clarify that “native” is required and that “shade” and “large growing tree” are synonymous;
- golf courses should be added to the exemption list in Section 5 of the by-law; and,
- wildlife values and interests within a tree should be considered more carefully with respect to provincial and federal Acts and Regulations and tied back to the by-law process to ensure a consistent approach;

it being noted that the communication appended to the 7th Report of the Trees and Forests Advisory Committee from the Tree Protection By-law Working Group, with respect to this matter, was received; and,

c) clauses 1.1, 2.1, 3.1, 3.2 BE RECEIVED (4.1/13/PEC)

C. Saunders
City Clerk
