Re: Bus Rapid Transit - Accessibility

The Rapid Transit Implementation project team is currently working through the Transit Project Assessment Process (TPAP) for London's BRT system. The draft Environmental Project Report (EPR) was approved by Council on May 8, 2018. The 120-day public consultation TPAP period commenced on June 7, 2018. During this time the project team has received feedback on design elements of the BRT system and have been seeking ways to incorporate that feedback.

As a result, the project team has refined details for accessibility features, most notably how level boarding will be achieved at BRT stops. The final EPR is to be published on October 4, 2018. In advance of that, the team is seeking input on the design refinements.

Details of how level boarding will be achieved including layouts of stop locations and ramps will be presented at the meeting.
