Planning Policies

Any change to the Zoning By-law must conform to the policies of The London Plan and the Official Plan, London's long-range planning documents.

The subject lands are in the "Neighbourhoods" Place Type in The London Plan, permitting a range of housing including single detached, townhouses and low rise apartments, "Green Space", permitting a range of open space, parks and conservation uses, and "Environmental Review", permitting existing uses.

These lands are currently designated as "Low Density Residential" which allows single detached, semi-detached, duplex dwellings and cluster housing at a maximum density of 30 units per hectare as the main permitted uses; "Multi-Family Medium Density Residential" which allows multiple attached dwellings at a maximum density of 75 units per hectare as the main permitted uses; "Open Space" which permits public open space uses including district, city-wide, and regional parks, and private open space uses such as cemeteries and private golf courses, and "Environmental Review", which permits agriculture, woodlot management, horticulture, conservation, recreational uses, and essential public utilities and municipal services (pending the evaluation of these areas through site-specific studies). The lands are within the Southwest Area Secondary Plan, within the Wonderland Boulevard Neighbourhood, and a small portion within the Lambeth Residential Neighbourhood, which includes special policies and direction for development, including urban design considerations, pedestrian connections, and incorporating varied housing types.

The site is presently within an Urban Reserve (UR4) Zone, which permits existing dwellings, agricultural uses except for mushroom farms, commercial greenhouses, livestock facilities and manure storage facilities, conservation lands, managed woodlot, wayside pit, passive recreation use, kennels, private outdoor recreation clubs, and riding stables, a Holding Urban Reserve (h-2*UR4) Zone, which permits the above uses, with a holding provision that requires an Environmental Impact Study prior to any development, and an Environmental Review (ER) Zone and an Environmental Review (ER) Zone, which permits conservation lands, conservation works, passive recreational uses, managed woodlot, and agricultural uses.
