

## Kilally South, East Basin, Municipal Class Environmental Assessment

**PUBLIC NOTICE**

**OCTOBER 17, 2018**

### Purpose of Study

The purpose Kilally South, East Basin Class Environmental Assessment (EA) is to evaluate a range of potential stormwater servicing alternatives and determine a preferred SWM approach to service 96 hectares of future development neighbourhood lands.

The EA will develop a range of alternatives including traditional end-of-pipe SWM facilities, Low Impact Development controls and the City's Permanent Private System. Through this study, the Class EA will provide a recommended approach for how to best achieve stormwater control targets, and work with the existing site conditions in the study area to ensure a holistic stormwater management approach is recommended to service the future neighbourhood development area.

### Process

The Class EA study will be undertaken in accordance with the Ontario Environmental Assessment Act and will cover all necessary phases of the Schedule 'B' EA Process. The Schedule 'B' process includes the definition of a problem or opportunity as well as the identification and evaluation of potential alternative solutions. There will be opportunity throughout the process for public input, including future Public Information Centres.

### Your feedback is important to us

To provide comments, request additional information, or receive future correspondence related to the project, please contact a member of the project team below:
