

Good Morning Jim

Volcano Mulching is on the list of pages/items that we intend to add to the web site as it continues to develop. We will have links to information on proper mulching, however as mentioned at TFAC the current web site does not offer us the ability to embed videos.

When the “black ring” information is ready to go, it will also be appearing on the web site. We are working with communication department to have consistent messaging across the various communications platforms we have.

Stay tuned! As mentioned, the web site will be a “living document” and will continue to evolve with new information and updates.

Cheers,

Kat

Subject: ideas for city trees website

Hey all!!!!

Just remembered that I forgot to ask how the problems with the black tree rings is being addressed in the new website? And how is it being promoted through the staff???

Also - we always hear about how bad it is for trees to be mulched like this....

I think a mulching video would be great way to talk about this.

Peace

Jim
