Re: **One River Master Plan EA - CHARs**

The One River Master Plan Environmental Assessment project team is currently in the final stages of preparing the draft report. This EA also includes Schedule B EA requirements for the decommissioning of Springbank Dam and for the construction of the inaugural Back to the River project at the Forks of the Thames.

Golders has completed draft Cultural Heritage Assessment Reports (CHARs) for Springbank Dam and the Forks of the River. Copies of the CHARs are attached for your review and comment. Project background and CHAR results will be presented at the meeting.
