ANALYSIS

In August 2012 the property owner submitted an application to remove the holding provisions from all lots and blocks in the Tricar Meadows Subdivision. The applicant is only interested in developing the high density multi-family block adjacent to Sunningdale Rd at this time. As a result, it is recommended that a portion of this application be deferred until such time as staff are in a position to consider removal of the holding provisions from the remaining lands in this subdivision.

MULTI-FAMILY HIGH DENSITY RESIDENTIAL BLOCK

The following analysis relates to the removal of the holding provisions from the high density multi-family residential development block only.

**h. Holding Provision**

The h. holding provision states that:

“To ensure the orderly development of lands and the adequate provision of municipal services, the "h" symbol shall not be deleted until a subdivision agreement or development agreement is entered into for the lands in question with the City of London.”

The applicant has entered into a development agreement with the City for the high density multi-family block which satisfies the requirements of this holding provision for lands zoned R9-7.

**h-100 Holding Provision**

The (h-100) holding provision states that:

“To ensure there is adequate water services and appropriate access, no more than 80 units may be developed until a looped watermain system is constructed and there is a second public access available to the satisfaction of the City Engineer, prior to the removal of the h-
The h-100 holding provision requires that a looped watermain system be constructed and a second public access is available for these lands. The looped waterman has not been constructed to date and as result is not appropriate to consider removal of this holding provision at this time. The applicant will be able to proceed with a partial building permit for the construction of the foundation and parking garage with this holding provision still in place. A further report will be submitted to the Committee recommending removal of this holding provision once the watermain has been looped.

h-119 Holding Provision

The (h-119) holding provision states that:

To ensure that the urban design objectives established through the Official Plan and Zoning amendment review process are implemented, a site plan will be approved and a development agreement will be entered into which, to the satisfaction of the General Manager of Planning and Development, incorporates these objectives and addresses identified urban design issues.

Community Planning and Design staff have reviewed the proposal and have confirmed that the urban design objectives established through the Official Plan and Zoning By-law amendment process have been met for this development and will be implemented through the approved site plan.

CONCLUSION

It is appropriate to remove the h. and h-119 Holding Provisions from the high density residential zone at this time based on the executed development agreement. Removal of these holding provisions will allow the property owner to apply for a building permit to commence construction of the lower floors of the building and permits for the remainder of the building (ie the residential units) will only be considered when the requirements of the h-100 holding provision have been addressed to the satisfaction of the City.
