

City of London Long Term Water Storage Municipal Class Environmental Assessment

NOTICE OF PROJECT COMPLETION

The City of London has completed a Municipal Class Environmental Assessment (MCEA) to determine a preferred site for additional water storage to meet future growth within the City and address emergency storage supply and distribution needs. The study also considered the feasibility of retiring the existing Springbank Reservoir #2, McCormick Reservoir, White Oak Filter Plant, Lambeth Outer Drive Reservoir, Lambeth Well Supply, Reservoir and Pump Station and the Southwinds Well Supply, Reservoir and Pump Station to better optimize the overall water system. The study also considered standby power options for Arva Pump Station as part of this MCEA process.

Water Storage

The study determined, through a comparative evaluation of several alternative locations, that the preferred water storage strategy is to construct a new 100ML in-ground storage reservoir at the existing Springbank Reservoir complex by 2024 to replace the existing 45ML storage (Reservoir #2) to be retired.

Back up Power

The study determined that a standby generator set in a new or existing structure to provide backup power to the Arva pump station in the event of a power failure would allow the Arva PS to meet the City's day to day, peak or emergency needs.

Decommissioning

The study determined the Springbank Reservoir #2, McCormick Reservoir, White Oak Filter Plant, Lambeth Outer Drive Reservoir, Lambeth Well Supply, Reservoir and Pump Station and the Southwinds Well Supply, Reservoir and Pump Station will no longer be necessary for operational purposes and can be decommissioned.

A Project File has been prepared and will be placed on public record on July 11, 2019 to August 26, 2019 for forty-five (45) calendar days to be reviewed by members of the public and/or any other interested party at the following locations:

City of London City Hall 300 Dufferin Avenue, London Water Engineering Division 8 th Floor	London Public Library Central Branch 251 Dundas Street, London
City of London www.london.ca/residents/Environment/EAs/Pages/LongTermWaterStorageOptions.aspx	

To provide comments, contact either of the following team members below:

Pat Lupton

Project Manager,
Corporation of the City of London
300 Dufferin Avenue
London ON, N6A 4L9
Tel: 519-661-CITY (2489) x. 5613
Email: plupton@london.ca

John Haasen

Project Manager,
AECOM Canada
250 York Street, Suite 410
London ON, N6A 6K2
Tel: 519-963-5889
Email: john.haasen@aecom.com

Information collected for the study will be used in accordance with the Municipal Freedom of Information and Protection of Privacy Act. Except for personal information, including your name, address and property location, all comments received throughout the study will become part of the public record and included in project documentation.

If concerns regarding this project cannot be resolved in discussion with the City of London, a person may request the Minister of the Environment Conservation and Parks (MECP) to issue an order to comply with Part II of the EA Act. This is known as a 'Part II Order', bumping up the status of this project to a full Individual Environmental Assessment. The procedure for a Part II Order request is as follows:

- First, the person with concerns directs them to the City of London and AECOM, during the forty-five (45) calendar day review period for consideration and mitigation.
- Second, if the concerns cannot be resolved, the person may submit a Part II Order request to the Minister of Environment Conservation and Parks by submitting the form found at the Ontario government Forms website (see below) by August 26, 2019. Search for "Part II Order" on the main page:

<http://www.forms.ssb.gov.on.ca>

The completed form and any supporting information must be sent to 77 Wellesley Street West, 11th floor, Toronto ON. M7A 2T5 with a copy of the request being sent to the Director of Environmental Assessment and Permissions Branch, the City of London and AECOM. All information required for submitting the Part II order including addresses are found on this form.

If no Part II Order requests are received by August 26, 2019, the project will be considered to have met the requirements of the Municipal Class EA and may proceed with detailed design, tendering and construction of the recommended works.

This Notice issued on July 11th, 2019.
