

Here's a little something for the next meeting. This is my first time writing an idea with 'backup documentation' so I hope I do a good job....

Topic - Sufficient Information Promotion To Stop 'Volcano' Mulching??

Problem - This is a great link with lots of information about the problems of volcano mulching
<https://www.totallandscapecare.com/business-best-practices/stop-mulch-volcanoes/>

I recently visited the City website to find information on this topic and I could not! Did I miss a link?

I found this link - <http://www.london.ca/residents/Environment/Trees-Forests/Pages/default.aspx> and I checked all the other links found on this page with no luck finding info on volcano mulching!

To discuss - I would like to discuss having information on the harms of volcano mulching included on the City website.

Since I cannot imagine any property owners, landscaping crews or even home owners ever taking the time to visit the City website to learn about this problem, I would like to discuss outreach programs with the public and business sectors.... as having the information on the City website is quite different than having the information in the hands of those who need it.

So - how's that, Pat??? Let me know if I need to include any more information to have this topic considered for an upcoming meeting.

Thanks!

Jim Kogelheide
