

Request to ACE from Diane Szoller, ACE member

I am interested to attend and report back to ACE on an upcoming conference entitled Sustainability: Transdisciplinary Theory, Practice, and Action to be held October 16-18 at the University of Toronto. I would ask for support financially (\$300) toward attending.

The path towards sustainability is possible only through a culture of sustainability that promotes the wellbeing of all generations, maintains healthy ecosystems, and fosters regenerative relations between natural, social, and technological systems.

We all have a role to play in the path towards sustainability. The conference will explore innovative forms of theory, practice, and action that can help craft a path towards global sustainability. The main theme of the conference is integration across disciplines, stakeholders, and sustainability pillars (such as social, environmental, and economic).

Examples of topics include: Transformative Learning and Sustainability

Representations of the Environment and Sustainability

Towards Improved Understanding of Variability in the Water Cycle Behavior and Water Resources

Geospatial Data and Analysis for Terrestrial Ecosystem Health

Human Health and Wellbeing

Mixed Analysis of Sustainability

Sustainable Food System Pedagogy

Animating the Urban: Urban Wildlife Between Encounter and Infrastructure
