Occupation: Associate, Urban Designer

Work experience: I have been an Urban Designer and Planner for the past 14 years. I have extensive experience in developing urban and architectural design guidelines, preparing community plans and site plans for specific built form or complexes, providing urban design peer review services for the City's of Brampton and Vaughan and the Towns of Ajax, Aurora, Georgina and Whitchurch-Stouffville and preparing secondary plans and official plan urban design policies.

Education: I have a Bachelor's Degree in Urban and Economic Geography and studied Urban Design at the University of Calgary. I am a full member of OPPI and CIP.

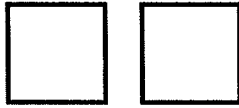

Skills: I have provided urban design peer review services for many municipalities throughout southern Ontario for the past 10 years including low and high density residential buildings, commercial blocks and complexes, industrial and institutional buildings. I am currently the Urban and Architectural Design Review consultant and peer review all development submissions. In addition to my professional experience I have experience from being a Committee of Adjustment panel member in the City of Toronto, I am an instructor in urban design at the Royal Architecture Institute of Canada's Syllabus Program and I have previous experience as a member on the heritage preservation panel at the City of Toronto.

Interest reason: I have a keen interest in urban design throughout Canada because I believe assisting in the creation of aesthetically pleasing urban spaces is beneficial and important to all communities. Being part of the panel in the City of London will provide me with the opportunity to take part in helping it realize it's Vision for Downtown London and other new developments in the rest of the City that also require care in design review.

Contributions: I believe the combined knowledge and experience afforded by my professional and volunteer activities will assist the panel in its deliberations by bringing a broad perspective to its proceedings.

Past contributions: As mentioned above I have taken part as a heritage preservation panel member at the City of Toronto and was involved in commenting on appropriate architectural applications in response to heritage structures. I have been a member of the Committee of Adjustment's Panel 'B' for the past 4 years and have dealt with projects ranging from residential additions to high rise condominium buildings, commercial and office buildings and providing planning and urban design assistance to the panel in general.

Interpersonal: My professional and volunteer work relies on strong collaboration skills and working towards a common goal of developing design solutions that are both

Kerri Killen

aesthetically pleasing and practical. In addition my Planning work requires that I coordinate with professionals from varied backgrounds including Architects, Engineers, Transportation Planners and Environmental and Heritage consultants which requires collaboration skills and learning from others.

Interview interest: **Yes**

Name: **Tom Tillmann**

Address:

Home telephone:

Business telephone:

Email:

Occupation:

Work experience: 27 years practicing architecture in London. The last 21 as a principal with architects Tillmann Ruth Robinson

Education: Bach. of Arch - University of Toronto OAA, MRAIC, LEED AP

Skills: The ability to recognize good design from no design and to be forthright and honest about it when expressing my opinion. Hopefully with over a quarter century of designing buildings under my belt I have aquired some of the needed knowledge to render competant and positive criticism

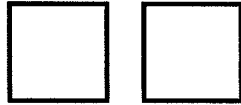

Interest reason: because the intent of the Urban Design Review Committee is important to the outcome of the built environment in the city. I firmly believe that design does matter

Contributions: I have lived in London most of my life but also take the opportunity to experience the world which has broadened my appreciation for good design. I have strong opinions on a weak design effort and the poor representation that accompanies it.

Past contributions: - mentor to the RAIC Syllabus program. Assisting architectural students in their pursuit to become licensed architects. - past director to the SJHC Board and the SJHCF Board (past president) - member/president of the Art for Aids International Board of Directors

Interpersonal: Collaboration and presenting views, ideas and recommendations is at the heart of what I do in my professional life.

Interview interest: **Yes**

Kerri Killen

Name: **Andrew Wilson**
