

NOTICE OF PLANNING APPLICATION

Official Plan Amendment

Protected Major Transit Station Areas (PMTSAs)

File: O-9208

Applicant: The Corporation of the City of London

What is Proposed?

Possible amendments to *The London Plan*, 2016, to designate Protected Major Transit Station Areas (PMTSAs) and add policies pertaining to building heights and minimum densities for these areas.

PMTSAs are the areas surrounding and including an existing and planned higher order transit station or stop, generally within a 500 to 800 metre radius (a 10-minute walk) of such transit stations. PMTSAs are planned to accommodate increased residential and employment density with highly urban, mixed-use, transit-supportive forms of development. PMTSAs will support the future implementation of rapid transit services in consistency with policies of *The London Plan*.

Possible amendments are to be in accordance with section 16 (15) of the *Planning Act*.

Requested Amendment to The London Plan (New Official Plan)

Possible amendment to identify Protected Major Transit Station Areas (PMTSAs) in the London Plan that align with the Downtown, Transit Villages, and Rapid Transit Corridor Place Types. Possible new policies pertaining to those PMTSAs to identify the minimum number of residents and jobs per hectare; identify permitted use, intensity and form within the PMTSAs; and identify the minimum densities in the PMTSAs. Possible amendments to the Our City chapter, Figure 5, and Map 7 in the London Plan to identify PMTSAs.

Planning Policies

The Downtown, Transit Village, and Rapid Transit Corridor Place Types in *The London Plan* are considered for high density, mixed-use, transit-supportive development and intensification due to the location of rapid transit stations.

The Downtown is planned to be the City's primary station for rapid transit, regional bus, rail and future high speed rail network. The Downtown allows for the greatest level of intensity and broadest range of uses.

Second only to the Downtown in terms of the mix of uses and intensity of development that is permitted, Transit Villages are major mixed-use destinations with centrally located rapid transit stations. They are intended to support the rapid transit system, by providing opportunities for higher density development in close proximity to rapid transit stations.

Rapid Transit Corridors connect the Downtown and Transit Villages along rapid transit routes. A wide range of permitted uses and greater intensities of development are encouraged in close proximity to transit stations to support transit usage.

This request represents residential intensification as defined in the policies of the Official Plan. Under these policies, City Planning staff and the Planning and Environment Committee will also consider detailed site plan matters such as fencing, landscaping, lighting, driveway locations, building scale and design, and the location of the proposed building on the site.
