

Committee: **Transportation Advisory Committee**

Name: **Mike Cuthbert**

Address:

**693 Windermere Road
Suite 310**

Occupation: **School Bus Driver**

Work experience: **I have worked primarily in the automotive field as a Quality Engineer, Quality Manager and Quality Auditor. I transitioned to Operations Manager while at Hino Motors Canada running an assembly plant for 3 years. After being downsized I accepted the position of school bus driver for Murphy Bus in London.**

Education: **PROFESSIONAL/TECHNICAL TRAINING AND CERTIFICATIONS Major Accomplishments Certified Six Sigma Black-Belt, Honeywell, 2000 Certified Six Sigma Green-Belt, AlliedSignal, 1999 • Certified Quality Auditor, CQA through ASQ, 1998 • Certified ISO 9000 Lead Assessor, IQA/IRCA Board of Assessors (serial No. 0123) 1995 Quality/Critical Thinking Skills (Certifications) Project Management - Kepner-Tregoe Problem Solving – Kepner-Tregoe 7 Step Corrective Actions – DaimlerChrysler Decision Making – Kepner-Tregoe Advanced Product Quality Planning (APQP) Systematic Problem Solving – Business 5-Principles of Problem Solving Documentation Processes Inc. ISO/QS 9000 Implementation and Documentation – Productivity Improvement Center (PIC) Quality System Assessment/Requirements – Automotive Industry Action Group ISO 14001 Internal Auditor Six Sigma Six Sigma Green-Belt – AlliedSignal Six Sigma Black-Belt – Honeywell Manufacturing Engineering Systems Analysis and Design – Industrial Inspection and Testing Statistical Process Control I & II Principles of Metrology Industrial Engineering Problem Solving Geometric Dimensioning & Tolerance Mechanical Blueprint Reading Excellence in Manufacturing – Implementation DC Electrical/Electronics Management Safestart Safety Training Effective Supervision – Human Relations Business Basics Effective Supervision – Safety Business Law Effective Supervision – Production People Management – Tools & Techniques Effective Supervision – Communication IAPA Courses Transportation of Dangerous Goods**

Skills: **Specialize in Statistical Analysis, and problem solving. I have been an active cyclist for 40 years, last year logging in more that 2000 km, mostly in the city of London. I have cycled in various locations including Toronto, Hamilton, Stratford, Ottawa, Quebec and country areas in Ontario.**

Interest reason: **I have a keen interest in cycling as an alternate mode of transportation. The city of London has and can continue to benefit from this mode of transportation and I would like to contribute to this success.**

Contributions: **I have researched and increased my knowledge on 'Urban Cycling' and how different cities in Canada, US and Europe have handled the issue. I have compared the pro's and con's to London and experienced what works and doesn't from my travels in the city. I would like to combine my knowledge and experience with others to help improve the safety and enjoyment of cycling in London.**

Past contributions: **This would be my first experience**

Interpersonal: **My numerous years in the automotive have given me not only experience in team environments but also in successfully creating and overseeing various teams. As Operations Manager for Hino I worked closely with team members and conducting monthly communication meetings and also effectively reporting to senior management through meetings and presentations. From my 15+ years experience as a Quality Engineer and Manager, quite often I had to express views and work with customers and suppliers. This required respecting their views, concerns, expertise in their area and resolving conflicts when necessary.**

Interview interest: **Yes**
