<b>2019-2023 STRATEGIC PLAN</b>
---------------------------------

The following report supports the 2019–2023 Strategic Plan through the strategic focus area of *Leading in Public Service*, by demonstrating leadership and accountability in the management and provision of quality programs and services.

<b>BACKGROUND</b>
-------------------

**Purpose**

The purpose of this report is to enter into an agreement with the Elgin Area Primary Water Supply System, the Aylmer Area Secondary Water Supply System, and the St. Thomas Secondary Water Supply System to allow for the joint occupancy and use of the Elgin-Middlesex Pumping Station. The agreement sets out the roles and responsibilities of the various parties moving forward.

## Context

The Elgin-Middlesex Pumping Station and Reservoir facility (EMPS) is located in northeast St. Thomas, at 490 South Edgeware Road. The Elgin Area Primary Water Supply System pumps treated water from the Lake Erie Treatment Facility into a reservoir at the EMPS. Pumps within the pumping station draw water from this reservoir for distribution to the three municipalities. There are eight pumps within EMPS. Three pumps provide water solely to London, three pumps provide water to the St. Thomas Secondary Water Supply System, and two pumps provide water to the Aylmer Area Secondary Water Supply System. The Ontario Clean Water Agency is the contracted operator for the EMPS.

In the year 2000, the Province of Ontario transferred ownership of the various EMPS components, dividing ownership among the Elgin Area Primary Water Supply System, and the municipalities of London, St. Thomas, and Aylmer. A copy of the transfer order has been included as Appendix 'C' – Transfer Order London-Elgin Middlesex W1/2000“. Over time it became apparent that there were minor inaccuracies and inconsistencies in the various transfer orders and subsequent Municipal Drinking Water Licenses and Drinking Water Works Permits. The attached agreement was created to deal with several of these inconsistencies. A clear understanding of ownership and operations of the EMPS facility is particularly important from a regulatory perspective and for the purposes of the annual Ministry inspections.

## DISCUSSION

### Joint Occupancy and Use Agreement

The Elgin Area Primary Water Supply System spearheaded an initiative whereby ownership issues at EMPS have been comprehensively reviewed by the partners involved. Discussions between the partners has resulted in the Joint Occupancy and Use Agreement for the EMPS, attached as Appendix 'B'.

The agreement clearly defines the ownership of the various facility components, including the property, buildings, reservoirs, pumps, pipes, electrical equipment, rechlorination equipment, back-up generators, etc. The agreement also clarifies issues related to operations and maintenance, payments of charges and expenses, asset management, repairs and capital expenses, etc.

At its meeting on June 4, 2020, the Elgin Area Primary Water Supply System Joint Board of Management accepted an asset management plan for the building and building-related assets of the EMPS. Therein, an occupancy rate was developed and is reflected in the Agreement proposed in this report. The *Elgin-Middlesex Station-Building Asset Management Plan* report can be found on the Elgin Area Primary Water Supply System's website.

The proposed Agreement in this report formalizes the tacit understanding between the partners that has been the basis of operation of the EMPS for many years.

## CONCLUSIONS

The Elgin-Middlesex Pumping Station and Reservoir facility provides drinking water to the City of London, as well as to the St. Thomas Secondary Water Supply System, and the Aylmer Area Secondary Water Supply System. Ownership of the various components of EMPS was transferred to the three municipalities and to the Elgin Area Primary Water Supply System by the Province of Ontario in the year 2000, but it has long been recognized that inaccuracies and inconsistencies existed in the various transfer orders.

The four owners have undertaken to formally clarify the issues related to the ownership and operation of the EMPS through the attached Joint Occupancy and Use Agreement.

This agreement will ensure the continued harmonious relationship between the owners of the EMPS, and provide clear delineation of ownership and operational responsibilities, which is particularly important for regulatory purposes and annual Ministry inspections.
