Transportation Advisory Committee

From: Roads & Transportation

Date: January 20, 2021

Subject: 2021 Neighbourhood Street Reconstruction Projects
Complete Streets Sidewalk Assessments

The Renew London Construction Program includes the reconstruction of neighbourhood streets in poor condition. To improve road user safety, connectivity, and accessibility, the 2020 neighbourhood reconstruction program implemented approximately 2,600 metres of new sidewalk on streets where they did not previously exist.

This program generally includes replacing the road and underground services where necessary and rebuilding and restoring areas disturbed by construction to current standards. As part of the design process, the complete streets assessment of the 2021 reconstruction projects is underway which considers area mobility needs, neighbourhood context including trees, and land use.

The assessment has identified that the streets listed in the table below are planned for reconstruction and do not currently have sidewalks on either side of the street.

Location	From	To
Abbey Rise	Longbow Road	Scarlett Avenue
Bartlett Crescent	Viscount Road	Kinnear Crescent
Elm Street	Trafalgar Street	Hamilton Road
Friars Way	Annadale Drive	Wychwood Park
Imperial Road	Grenfell Drive	Balcarres Road
Paymaster Avenue	Burlington St	east limit
St. Anthony Road	Hyde Park Road	Hampton Crescent
Tarbart Terrace	Deer Park Circle	Deer Park Circle
Doncaster Place	*	
Culver Place	*	
East Afton Place	*	

* The streets without “from” and “to” limits are short court-style dead-end streets. The entire length of these streets is planned for reconstruction.

The committee’s input into the complete streets assessment of sidewalk needs is welcome.
