

March 26th, 2013

To the Chair and Members of the Planning and Environment Committee:

Councillor Polhill (Chair)  
Mayor Fontana  
Councillor Branscombe  
Councillor Henderson  
Councillor Hubert  
Councillor White

Thank you for the opportunity to provide input into the Medway Valley Trail Discussion. I am a resident of the area and will be directly impacted by the recommendation the Planning and Environment Committee makes on this issue. For this reason, I hope that you will factor my input into your decision making process.

I have been anxiously awaiting the completion of the Medway Valley Trail. I am aware that many options have been evaluated and discussed and that the City has sought public feedback along the way. My position has not changed, I would like to see Option 4A – Continuous Link.

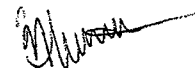

As a local resident, I plan to use this pathway for the community connections to the adjacent subdivisions it will bring and also for the physical, social and emotional benefits. As an active person who appreciates the outdoors, I plan to access the pathway year round with my family. For this reason, I would like to see the pathway be constructed with asphalt. This will provide a well delineated, safe and stable surface that can be accessed year round by all our residents – whether they are young children, seniors, or those with mobility issues. As a working mother in the healthcare field, it is extremely important to me that my family remain active and have the ability to enjoy the outdoor paths year round.

I appreciate the environmental significance of the area and feel strongly that through well thought out pathway placement and construction, the social and environmental interests can be balanced. By employing public education information in the area, I have no doubt that the current and future residents of the area will be good stewards of this unique natural resource.

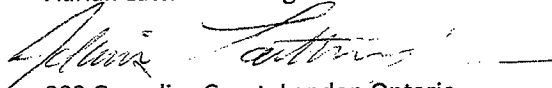

Please include this letter within the Planning and Environment Meeting Agenda Package.

Sincerely,

Nisha Lattanzio M.Pharm

Adrian Lattanzio P.Eng

Dear Sir/Madam

Thank you for the opportunity to provide input into the Medway Valley Trail Discussion. I, along with my wife and 3 young children are residents of the area and will be directly impacted by the recommendation the Planning and Environment Committee makes on this issue. For this reason, I hope that you will factor my input into your decision making process.

We have been anxiously awaiting the completion of the Medway Valley Trail, as a mean's of connecting our new neighbourhood of Upper Richmond Village on the north side of Sunningdale Road with neighbourhoods to the south of us. I am aware that many options have been evaluated and discussed and that the City has sought public feedback along the way. My position has not changed, I would like to see Option 4A – Continuous Link.

As residents, we plan to use this pathway for the community connections to the adjacent subdivisions it will bring and also for the physical, social and emotional benefits. As a family we specifically chose the Upper Richmond Village neighbourhood due to its community plan and access to green space and natural areas. As an active family we appreciate the outdoors, and we plan to access the pathway year round. For this reason, I would like to see the pathway be constructed with asphalt. This will provide a well delineated, safe and stable surface that can be accessed year round by all our residents – whether they are young children, seniors, or those with mobility issues.

We appreciate the environmental significance of the area and feel strongly that through well thought out pathway placement and construction, the social and environmental interests can be balanced. Having spoken with my neighbours about this issue, we all appreciate the environmental concerns and therefore know that through employing public education information in the area, we have no doubt that the current and future residents of the area will be good stewards of this unique natural resource.

Please include this letter within the Planning and Environment Meeting Agenda package.

Sincerely,

Jonathan Batch & Elizabeth Abbott

Dear Sir/Madam

As the Medway Valley Trail Discussion continues, it is important that local residents have input into the decision you have been entrusted to make. We are residents of the area and will be directly impacted by the recommendation the Planning and Environment Committee makes on this issue. We appreciate that our input be factored into your decision making process.

We are aware that many options have been evaluated and discussed and that the City of London has sought public feedback throughout the process. Our family's position has not changed we would like to see Option 4A – Continuous Link.

The City of London has successfully built trails connecting various areas within our city for the health, social and emotion benefit of all city residents. Continuing to extend these trails by connecting our region benefits all residents, as well as future residents of the general area.

As local residents, we plan to use this pathway for the community connections to the adjacent subdivisions. As avid runners and cyclists, we would use this trail, year round, for the physical and health benefits as well as for the social implications. I also appreciate that the asphalt path would provide year round access for my family, as well as members of our greater community, specifically young children, seniors and members with mobility challenges.

I appreciate the environmental significance of the area and feel strongly that through well thought our pathway placement and construction, the social and environmental interests can be balanced. I have no doubt that the current and future residents of the area will be good stewards of this resource.

Please include this letter within the Planning and Environment Meeting Agenda package.

Sincerely,  
Rob, Janet, Taylor and Jaxon Lee
