Re: Audible Pedestrian Signal Priority List

As we construct traffic signal or build new traffic signal audible pedestrian signal (APS) equipment is installed. Two hundred and thirty-three (57 %) traffic and pedestrian signals are equipped APS equipment.

We receive a budget of \$50,000 annually to upgrade an intersection with APS equipment that is not scheduled to be rebuilt. We have exhausted the list of previous AACCA priority locations, and we would like your assistance prioritizing the remaining intersections without APS equipment. A priority rating of High-Medium-Low or 1 to 10 would give us guidance to the signals that should be brought forward for APS equipment installation. Not included in the below table are the intersections that will be impacted by the Bus Rapid Transit project that started rolling out this year.
