

Dingman Creek Subwatershed Stage 2 Lands Municipal Class Environmental Assessment

PUBLIC NOTICE

SEPTEMBER 2, 2021

Purpose of Study

The purpose of the Dingman Creek Subwatershed Stage 2 Lands Municipal Class Environmental Assessment (EA) is to update the regulatory floodplain for Dingman Creek and assess potential flood mitigation and stormwater servicing alternatives to address imminent and future flooding and erosion risk within the subwatershed.

Through the EA, a range of flood mitigation and stormwater management strategies will be developed. The recommended approach will guide future development, identify mitigative and adaptive flood control works and align with the City's vision for the creek corridor to integrate natural heritage, stormwater management and recreational uses.

Process

The EA study will be undertaken in accordance with the *Ontario Environmental Assessment Act* and will cover all necessary phases of the Schedule 'C' EA Process. This process includes definition of the problem/opportunity, identification and evaluation of alternative solutions, and selection of a preferred one. There will be opportunity throughout the process for public input, including future Public Information Centres. As the study progresses, information and notices will be posted on the City's "Get Involved" website: <https://getinvolved.london.ca/dingmancreek>

Your feedback is important to us
