Total Planted: CoL and Community Groups		5961	3274	921	292	353	1121

DBH Classes

0-9	10-49	50-99	100 +

data mining required for L/M/O breakdown
data mining required for L/M/O breakdown

Removed by City of London	Total
Regular Mtce	
EAB	unknown
Road/Sewer Construction Related	
For Development applications	unknown
Total City Trees Removed	0

Planting Requests	Total
# Requests planted so far this year	?
# Requests Resolved with no Planting	?
# Still in System	?
Total Requests	0

We couldn't identify planting workorders associated with removal workorders from just planting requests from homeowners. They sometimes overlap

Measures	Value	Description
% of Requests fulfilled this year	#VALUE!	(I think this is # infill planted / # requested planted ?)
Length of time requests waiting???		
Replacement planting rate (%)	#DIV/0!	(Trees Planted by City/Trees removed)

It should be noted that all the numbers above are a best estimate. In some cases, information of the specific size of tree is not available without considerable work to find the numbers. The removals are based on unreliable reports generated from both the inventory and the work orders and fluxuate each time a report is generated. This document is a working copy meant to give a general picture of the tree planting and removals in the City, but should not be used as exact numbers. Some numbers with respect to EAB removals and planting have not been recieved from Forestry operations.
