If you selected 'Other', please specify:

Contact Information

Name: **Antonio D Santiago**

City: **London**

Province: **ON**

Postal Code: **N6E 3K2**

Experience and Qualifications

If you have experience on a London Advisory Committee, please provide dates and details. (max. 250 characters): **NA**

What do you hope to contribute or learn as part of a Community Advisory Committee? (max. 250 characters): **I want to contribute my extensive experience in running a community. I also have substantial experience in planning and implementation of traffic management in a large community, coupled with transportation and logistics in industry and agriculture. As a mechanical engineer, I am very interested in all things mechanical and how they are utilized and contribute to the environment. My substantial experience in management has taught me how to interact and deal with people to achieve their maximum potential. On the other hand, I would love to learn how an Advisory Committee works, the interactions they participate in, and how they fit in as one of the cogs in the overall operation and management of a medium-sized urban environment. Furthermore, I would like to learn how in the grand scheme of things, the Advisory Committee contributes to the furtherance of the environment that we all live in.**

How will you support the work of a Community Advisory Committee? (max. 250 characters): **Topmost in the list of furthering the work of a Community Advisory Committee is attendance at the regular meetings where the core of the task of the Committee happens. You need to be there to make things happen. The next item in the list would be participation in the deliberations and contribution to the knowledge and ideas that are needed to get the tasks at hand accomplished. You must, however, do the groundwork before the meetings by boning up on the knowledge required by research and feedback from people who may be affected by the changes that may be happening. Community involvement is another key factor and this takes place with the solicitation of feedback from the community. Finally, collaboration and cooperation are needed to support the work of the Committee and this requires smooth interpersonal relations with other committee members, city government personnel, and the general public.**

Please describe additional experience, training, or community involvement that will help you in your role as a Community Advisory Committee Member. (max. 250 characters): **I have managed a corporate community of around 20,000 people that was situated inside an agricultural manufacturing site of around 400 hectares. This included traffic operations and management, public transportation, waste and recycling collection and disposal, power, water, security, public health, grounds maintenance, and improvements. I was**

likewise tasked with providing the operational and capital budgets for the running of the community and the implementation thereof. I was like the mayor of the community only I did not have a council, nor was I elected to the position. I was answerable to my superior, nevertheless. This was just one of my many tasks as Division Manager for Management Services of a large conglomerate, although it took up a substantial chunk of my daily activities as it was a 24/7/365 operation. The role was good training for an elective position, nevertheless. I am a registered Professional Engineer with PEO although I am mostly retired from active work.
